Excerpt: .Germanic Type. range is much lower, and its slopes are quite gentle. In the northwest the narrow Scandinavian plateau rises abruptly along the coast of Norway to a height of about a mile, but slopes gently eastward to the Gulf of Bothnia. This highland is capped with snow fields, and in the north sends many glaciers down into the deep fiords which border the Atlantic coast. The northwestern part of Great Britain is also traversed by low mountain ranges. The whole of northern Europe between the Scandinavian and British highlands on the northwest, and the Alpine and Caucasus systems on the south, is a vast low and nearly level plain, extending from the Bay of Biscay to the Ural Mountains. This lowland covers two thirds of Europe, and is nowhere more than 600 feet above the sea, while near the coasts of the North Sea...
