Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.Durability is one of the least understood attributes of the nation s housing stock. Although many attempts have been made to provide solutions to real and perceived durability problems, little has been done to benchmark and monitor the durability of U.S. housing. Such information can provide the proper focus and perspective for improving housing durability while avoiding costly mistakes that may adversely affect the affordability or longevity of homes. In response to the lack of information, the U.S. Department of Housing and Urban Development commissioned a pilot study of the durability performance of a representative sample of homes in Anne Arundel County, Maryland. This report presents the findings of facts from this pilot study and provides useful criticisms of the study methodology. The study reports several interesting statistics, cause-and-effect relationships, and observations on housing durability. The report also discusses lessons learned from the study with a view toward improved techniques should this effort be expanded to a regional or national level. The findings of this study not only demonstrate the feasibility of benchmarking and monitoring the durability of...
