GEOMETRIES OF SILENCE: THREE APPROACHES TO NEOCLASSICAL ART (HARDBACK)

Columbia University Press, United States, 2004. Hardback. Book Condition: New. 180 x 142 mm. Language: English . Brand New Book. Based on little-known or hitherto unpublished material and enhanced by a wealth of rarely seen illustrations, this book offers access to the aesthetics of neoclassical Europe from a new perspective: landscape painting and interior decoration. The source documents, together with the nexus of relationships they helped to establish, reveal a world shaken by a series of epochal changes. This study of paintings, drawings, and documents touches on such themes as the rediscovery of the ancient world, aristocratic homes in the neoclassical period, and the birth of the rationalist landscape. While the most important artists are French, the chosen vantage point is Rome, because of the impact of antiquity on aesthetic perceptions toward the end of the century. The book insightfully analyzes the last years of the eighteenth century through the visual representation of that world, a world that has been handed down to us through the response of contemporary artists to momentous changes. This book portrays drawing as an instrument of knowledge: an absolute experience, not merely an intermediate phase in the production of a painting. Anna Ottani Cavina leads us to modernity, which through the rarefaction of the image, silence, and emptiness attained heights of emotional and intellectual intensity that drawing was able to capture with extraordinary immediacy.
