Realizing the necessity of such a course in connection with Mental Exercises, the author gave quite a large collection of written exercises in his Primary Mental Arithmetic. So popular was this feature that he was soon urged either to increase the amount of such matter or prepare another work treating exclusively of the elements of Written Arithmetic. Believing that the latter plan would be the more acceptable, and give more completeness to the arithmetical course, the present volume has been prepared. This work will be found to possess at least five distinguishing features: 1st, Simplicity; 2d, Gradation; 3d, Practical Character of the Problems; 4th, Variety of Problems; 5th, Educational Character. Simplicity. - Great care has been taken to make the definitions, explanations, solutions, rules, etc. so simple that the youngest pupils can easily understand them. In doing this, however, the scientific character of the subject has not been sacrificed; for it should ever be remembered that the highest science is the greatest simplicity; and, simplicity is the highest science.
